Introduction

This release contains priority fixes driven by critical on-demand requests in Kofax ReadSoft Invoices 6.2.0.12.

Note: To install Kofax ReadSoft Invoices 6.2.0.12, an existing full installation of Kofax ReadSoft Invoices 6.2.0 is required.

If you need to perform a full product installation, see the *Kofax ReadSoft Invoices Installation Guide* for instructions.

Issues resolved in this fix pack

| ID | Issue | Solution |
|--------|---|--|
| 275560 | The values could not be captured correctly due to the absence of space between the titles and their values. | A new flag, DiscardTextBeforeColonForCHNBuyerFields, is added to the [Interpret] section in eiglobal.ini, which discards the text before the colon (:) for the "BuyerName" and |

| ID | Issue | Solution |
|--------|---|---|
| | | "BuyerVATRegistrationNumber" fields for invoices processed through the Chinese profile. |
| 274826 | The Scan module failed when attempting to autostart the module using the command line parameters. | The function that calls the location and handles the null referenced object is changed. |

Applies to

This fix pack is cumulative and includes the resolved issues released in previous Kofax ReadSoft Invoices 6.2.0 fix packs.

Apply this fix pack to update any of the following versions:

- Kofax ReadSoft Invoices 6.2.0 Fix Pack 1 through Fix Pack 11
- Kofax ReadSoft Invoices 6.2.0

Files included

This fix pack includes the following files:

| File name | Version |
|--|---------------|
| KofaxReadSoftInvoices-6.2.0.12.0.24502.msp | 6.2.24502.139 |
| ReadMe-KofaxReadSoftInvoices-6.2.0.12.htm | N/A |

Install this fix pack

Note: Before installing ReadSoft Invoices 6.2.0.12, uninstall any previous OmniPage version and install OmniPage Ultimate 22.2.0.3 included in fix pack 11.

Use the following procedure to install this fix pack.

1. Verify that the following applications/services are not running.
 - Kofax ReadSoft Invoices 6.2.0
 - Kofax ReadSoft Invoices Service
 - Antivirus software

Note: For best results, install the fix pack during off-peak processing hours.

2. Extract the contents of **KofaxReadSoftInvoices-6.2.0.12.zip** on the computer where Kofax ReadSoft Invoices is installed.
3. To install this fix pack, double-click **KofaxReadSoftInvoices-6.2.0.12.0.24502.msp**.
The fix pack installer screen appears.
 - a. Click **Next** to proceed with the installation.
 - b. Follow the instructions on subsequent installer screens.

4. When prompted that the installation is finished, click **Finish**.
5. Restart any applications/services stopped before installing this fix pack.

Remove this fix pack

Use the following procedure to remove this fix pack.

1. Verify that the following applications/services are not running.
 - Kofax ReadSoft Invoices 6.2.0
 - Kofax ReadSoft Invoices Service
 - Antivirus software

Note: For best results, remove the fix pack during off-peak processing hours.

2. In Control Panel, select **Programs and Features > View installed updates**.
3. On the list of updates, in the **Name** column, select the item that corresponds to **Kofax ReadSoft Invoices 6.2.0.12**.
4. Right-click and select **Uninstall**.
5. Restart any applications/services stopped before removing this fix pack.
